Applications

return to the Public Area

data_distribution_service_dds is used in many kinds of industries and is used in many different applications within those industries. A major goals of the DDS Foundation are promoting industry-specific:

- **adaptations and implementations**
- **use-case libraries**
- **data models**

To accomplish this goal, this area focuses on existing Applications that use DDS.

Create a Case Study **WWW WWW...** (e.g., My NASA Project) →
