

Cloud Computing

[Return to Applications](#)

Cloud Computing describes anything that involves delivering hosted services over the Internet. Cloud Computing is still in its early stages, but has the potential to drastically change how we do business, access information, and communicate.

[data_distribution_service_dds](#) allows for real time, on demand, scalable, distribution of dynamic discovery data, allowing our customers (and theirs) to take advantage of the many aspects of Cloud Computing, including reliability and security.
