

TOPIC_DATA QoS Parameter

[return to the Quality of Service \(QoS\) Parameters](#)

The TOPIC_DATA QoS allows the application to attach additional information to the created [Topic](#) such that when a remote application discovers their existence it can examine the information and use it in an application-defined way. In combination with the listeners on the `DataReader` and `DataWriter` as well as by means of operations such as `ignore_topic`, these QoS can assist an application to extend the provided QoS.
