| Product/Service Description | CoreDX DDS is the leading small-footprint DDS Middleware available. CoreDX DDS is an easy-to-use, cross-platform, cross-language Inter-Process Communication (IPC) library. CoreDX DDS is high-performance and low-overhead, with great latency and message throughput numbers. CoreDX DDS provides robust, flexible, and dynamic data communications. Based on Open Standards for guaranteed Interoperability and long term viability, CoreDX DDS is the preferred IPC for a wide variety of distributed software programs: from mobile games and consumer electronic devices to surgical equipment, health care applications, complex DoD systems and robots working in space. CoreDX DDS is essential for effective Open System architectures. |
| Sales Contact               | Nina Tucker                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
