

Entity

Entity is a general term for a DomainParticipant, Publisher, Subscriber, DataWriter, DataReader or Topic.

Entity is an interface defined in the OMG DDS specification, with the following characteristics:

- Configured using a QosPolicy
- Accepting a Listener
- Accepting a StatusCondition

This is the base interface for DomainParticipant, Publisher, Subscriber, DataWriter, DataReader, and Topic classes. Any group of objects of these subclasses may be referred to as Entities.
