Description	http://www.ethdocs.org/en/latest/ethereum-clients/go-ethereum/index.html
Category	Client

Abstract

Source: [Pyethapp Project](#)

***pyethapp** is the python-based client implementing the Ethereum cryptoeconomic state machine. The python implementation aims to provide an easily hackable and extendable codebase.*

pyethapp leverages two ethereum core components to implement the client:

- *pyethereum* - the core library, featuring the blockchain, the ethereum virtual machine, mining
- *pydevp2p* - the p2p networking library, featuring node discovery for and transport of multiple services over multiplexed and encrypted connections
