Talk Openly Develop Openly (TODO)

return to the de facto Standards area

Create a New Page for TODO **Full Name** →	You are not allowed to add pages

Source: The following is from the TODO About page

> *Open source is part of the fabric of each of our companies. Between us, our open source programs enable us to use, contribute to, and maintain, thousands of projects - both large and small.*
>
> *These programs face many challenges, such as ensuring high-quality and frequent releases, engaging with developer communities, and contributing back to other projects effectively.*
>
> *The members of this group are committed to working together in order to overcome these challenges. We will be sharing experiences, developing best practices, and working on common tooling. But we can't do this alone. If you are a company using or sharing open source, we welcome you to join us and help make this happen.*
>
> ***TODO**: **talk openly, develop openly**. We believe we will improve our open source programs - and our contributions to the open source movement as a whole - by working together.*

de facto Standards

Build an Open Source Program

- TODO: How to create an open source program
- TODO: Measuring your open source program's success
- TODO: Tools for managing open source programs

Manage an Open Source Program

There have been many books written on this subject: [1)]

- TODO: Using open source code
- TODO: Participating in open source communities
- TODO: Recruiting open source developers
- TODO: Starting an open source project
- TODO: Improve your open source development impact
- TODO: Shutting down an open source project
- TODO: Building leadership in an open source community
- TODO: Setting an Open Source Strategy
