

Oracle Solaris

[Return to Operating Systems](#)

Oracle Solaris is a proprietary [Unix operating system](#) originally developed by Sun Microsystems. It superseded the company's earlier SunOS in 1993. In 2010, after the Sun acquisition by [Oracle](#), it was renamed Oracle Solaris.

Solaris is known for its [scalability](#), especially on SPARC systems, and for originating many innovative features such as DTrace, ZFS and Time Slider. Solaris supports SPARC and x86-64 workstations and servers from Oracle and other vendors. Solaris was registered as compliant with UNIX 03 until 29 April 2019.
