Ubuntu Linux

Return to Operating Systems

Ubuntu Linux is a Linux distribution based on Debian and mostly composed of free and open-source software. Ubuntu is officially released in three editions: Desktop, Server, and Core for Internet of things devices and robots. All the editions can run on the computer alone, or in a virtual machine. Ubuntu is a popular operating system for cloud computing, with support for OpenStack. Ubuntu's default desktop has been GNOME, since version 17.10.

Ubuntu is released every six months, with long-term support (LTS) releases every two years. As of 22 October 2020, the most recent long-term support release is 20.04 (“Focal Fossa”), which is supported until 2025 under public support and until 2030 as a paid option. The latest standard release is 20.10 (“Groovy Gorilla”), which is supported for nine months.

Ubuntu is developed by Canonical, and a community of other developers, under a meritocratic governance model. Canonical provides security updates and support for each Ubuntu release, starting from the release date and until the release reaches its designated End-of-life (EoL) date. Canonical generates revenue through the sale of premium services related to Ubuntu.

Ubuntu is named after the Nguni philosophy of ubuntu, which Canonical indicates means “humanity to others” with a connotation of “I am what I am because of who we all are”.

Datasheet	
Developer	Canonical Ltd.
Written in	
OS family	Linux
Working state	Current
Source model	Open Source
Initial release	20 October 2004
Latest release	Ubuntu 20.10 / 22 October 2020
Available in	More than 55 languages
Platforms	IA-32, x86-64, ARM64, ARMhf (ARMv7 + VFPv3-D16), ppc64le (POWER8 and later), s390x
Kernel type	Linux Kernel
Userland	GNU
Default user interface	GNOME
License	Free software + some proprietary device drivers
