Windows XP

Return to Operating Systems

Windows XP is an operating system produced by Microsoft as part of the Windows NT family of operating systems. It was the successor to both Windows 2000 for professional users and Windows Me for home users. It was released to manufacturing on August 24, 2001, and broadly released for retail sale on October 25, 2001.

Development of Windows XP began in the late 1990s as “Neptune”, an operating system (OS) built on the Windows NT kernel which was intended specifically for mainstream consumer use. An updated version of Windows 2000 was also originally planned for the business market; however, in January 2000, both projects were scrapped in favor of a single OS codenamed “Whistler”, which would serve as a single OS platform for both consumer and business markets. As such, Windows XP was the first consumer edition of Windows not to be based on MS-DOS.

Upon its release, Windows XP received critical acclaim, with critics noting increased performance and stability (especially in comparison to Windows Me), a more intuitive user interface, improved hardware support, and expanded multimedia capabilities. However, some industry reviewers were concerned by the new licensing model and product activation system.

Extended support for Windows XP ended on April 8, 2014, after which the operating system ceased receiving further support or security updates (with exceptional security updates being made e.g. in 2019, to address potential ransomware threats, like BlueKeep) to most users. By August 2019, Microsoft (and others) had ended support for games on Windows XP. As of October 2020, 0.8% of Windows PCs run Windows XP, and 0.29% of all devices across all platforms run Windows XP. A few countries still have double-digit use, e.g. Armenia, where it's being replaced by Windows 10, with both operating systems having over 40% use

Datasheet	
Developer	Microsoft
Written in	
OS family	Microsoft Windows
Working state	Deprecated
Source model	Closed-source, Source-available (through Shared Source Initiative)
Initial release	24 August 2001
Latest release	Service Pack 3 (5.1.2600), 21 April 2008; Some securoty updates available up to 2019, especially for embedded XP
Available in	
Platforms	IA-32, x86-64, and Itanium
Kernel type	
Default user interface	
License
