Tools: Code Reviews

Return to Tools

Source: Tools for managing open source programs

- ***mention-bot*** *– Developed by Facebook, this tool automatically mentions potential reviewers for code contributions by community members to speed up the review process.https://github.com/facebook/mention-bot*
- ***PullApprove*** *– Brings more formalization to code contributions – or pull requests – by improving code quality through peer-review, enforcing style guidelines, catching errors and providing security checks on code.https://about.pullapprove.com/*
- ***sentinel*** *– A repository management bot which reviews and tests code contributions, builds a list of maintainers for the repository and communicates the status of a pull request with users.https://github.com/habitat-sh/sentinel*
