

Tools: Code Reviews

[Return to Tools](#)

Source: [Tools for managing open source programs](#)

- **mention-bot** – Developed by Facebook, this tool automatically mentions potential reviewers for code contributions by community members to speed up the review process. <https://github.com/facebook/mention-bot>
- **PullApprove** – Brings more formalization to code contributions – or pull requests – by improving code quality through peer-review, enforcing style guidelines, catching errors and providing security checks on code. <https://about.pullapprove.com/>
- **sentinel** – A repository management bot which reviews and tests code contributions, builds a list of maintainers for the repository and communicates the status of a pull request with users. <https://github.com/habitat-sh/sentinel>
