Appendix C: Tools

return to the Public Area **OR** return to Reference Architecture (RA)

As with all projects, DIDOs require tools to support their development, management, and operation. The following lists of tools are meant to be informative and by no means exhaustive.

Community Tools

The following tools are used to aid in the development of software, particularly the development of Open Source Software (OSS).

- license-scan
- bugtrack
- release-mgmt
- project-health
- code-review
- code-signing
- project-oversigt
- project-quality
- logging

Network Traffic Analysis Tools

- netwrkAnal

Tools for communications and collaboration

- Tools TBD

Tools for corporate-scale GitHub management

- Tools TBD
